This table attempts to illustrate the various possible formats/combinations of former UK STD Numbering

	Major Cities (Director Exchanges)	Leading Zero	Code	Child Exchange Prefix	Local Number Format/Length		Final Format
	London	0	1		xxx xxxx		01-xxx xxxx
	Birmingham	0	21		xxx xxxx		021-xxx xxxx
	Edinburgh	0	31		xxx xxxx		031-xxx xxxx
	Glasgow	0	41		xxx xxxx		041-xxx xxxx
	Liverpool	0	51		xxx xxxx		051-xxx xxxx
	Manchester	0	61		xxx xxxx		061-xxx xxxx
	All other UK areas (Non-Director Exchanges)*						
	Main Exchange/GSC Number Formats						
		0	xxx		xxxx		0xxx xxxx
		0	xxx		xxxxx		0xxx xxxxx
		0	xxx		xxxxxx		0xxx xxxxxx
	Child Exchange Number Formats						
		0	xxx	x	xxxx		0xxx x xxxx
		0	xxx	x	xxxxx		0xxx x xxxxx
		0	xxx	xx	xxx		0xxx xx xxx
		0	xxx	xx	xxxx		0xxx xx xxxx

***These codes were consistent, in that there were always 3 digits after the initial '0'**

Any 2 digit child exchange codes were usually in the format '8x'. Occasionally, some were designated other digits i.e: '7x' (as was the case for Gargrave, Skipton: 0756 78 xxx)

Levels 2-9 were normally used for subscriber numbering on director exchanges and usually, 2-7 on non-director exchanges .

Numbers on Level 1 were rarely allocated to subscribers. This level was reserved for service numbers i.e. '100' for Operator Service

Please note that this is a simplified list and not intended to be extensive.
